

"Hacking Hotmail Accounts"

Written by flAmingwOrm & secret01

Introduction

Hello guys, and welcome to my first eBook! In this tutorial, I'll show you how to hack hotmail accounts, using a vulnerability in Hotmail.

This tutorial is for educational purposes only, I am NOT responsible in any way for how this tutorial is used, use it at your own risk, also you can learn how to get your account back from this.

Step by step guide with pictures

Well, before we start, I would like to tell you that this method doesn't work 100%. It has a chance of 30% to hack an account! Btw, most of popular ones are already hacked.

First, go to www.hotmail.com and click "Forgot your password?"

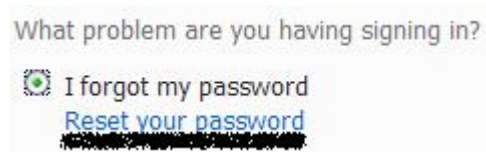

sign in

Windows Live ID:

Password:

[Forgot your password?](#)

Now choose "I forgot my password" and under it, it should pop-up a message saying "Reset my password". Click it.

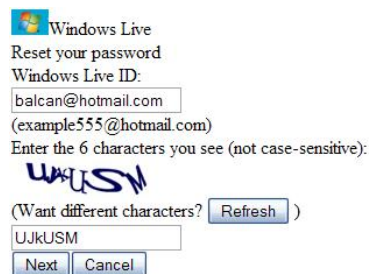

Now, type the email you want to hack, type the captcha and press "Next".

Now choose "Email me a reset link" and their alternative email will show. But unfortunately, only a few characters are shown, the others are hidden. There is no way to see them, so we are going to use the vulnerability in Hotmail.

The vulnerability in Hotmail - How to use it

Go to <http://maccount.live.com/ac/resetpwdmain.aspx> and enter the email address you want to hack, type the captcha and press "Next".

Windows Live
Reset your password
Windows Live ID:
balcan@hotmail.com
(example555@hotmail.com)
Enter the 6 characters you see (not case-sensitive):
UJKUSM
(Want different characters? [Refresh](#))
UJKUSM
[Next](#) [Cancel](#)

Now after you press "Next" it will tell you to reset the password again, however the email is hidden still, only the first characters are shown.

By email

Send password reset instructions to these email addresses:

ve*****@hotmail.com

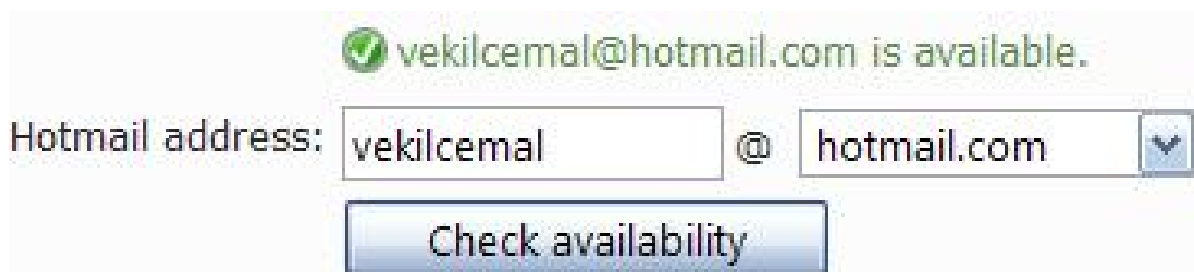

[Send email](#)

Well, here is the vulnerable in the Hotmail systems. Now, after we press "View Source" in the page, we'll be able to see the full e-mail.

```
<input type="hidden" name="__V_PreviousForm" value="EntryForm">  
<input type="hidden" name="__V_SecretQuestion" value="En çok sevdiğiniz spor takımı?">  
<input type="hidden" name="__V_EmailList" value="vekilcema@hotmail.com|">
```

Now, after we got his alternative email, go back to www.hotmail.com and click "Sign Up".

Try to register with the alternative email you got. If the email is available to register, that means the exploit worked and you will be able to get the account you want!

✓ vekilcema@hotmail.com is available.

Hotmail address: @ [▼](#)

[Check availability](#)

Now, register the account. After you are done, go back to the link where you got his email and click "Send Email".

By email

Send password reset instructions to these email addresses:

ve*****@hotmail.com

Send email

After you sent the password reset mail, go to the inbox and you should receive a new message.

<input type="checkbox"/>	Windows Live Team	 Windows Live Password Reset	1:24 PM
<input type="checkbox"/>	Hotmail Team	 Getting started with Windows Live Hotmail	1:23 PM

Now, open the message which says "Windows Live Password Reset".

And this is what I got.

Did you request a password reset for your Windows Live account
(balcan@hotmail.com)?

If you requested this password reset, go here:

[https://account.live.com/password
/resetconfirm?otc=*CcKrLbmXKditu5v7WZJ4i4okvoKMncrc*ULKNXHyYcWlg5QIjg\\$\\$&
mn=balcan%40hotmail.com](https://account.live.com/password/resetconfirm?otc=*CcKrLbmXKditu5v7WZJ4i4okvoKMncrc*ULKNXHyYcWlg5QIjg$$&mn=balcan%40hotmail.com)

If you didn't make this request, use this link to cancel it:

[https://account.live.com/password
/resetcancel?otc=*CcKrLbmXKditu5v7WZJ4i4okvoKMncrc*ULKNXHyYcWlg5QIjg\\$\\$&
mn=balcan%40hotmail.com](https://account.live.com/password/resetcancel?otc=*CcKrLbmXKditu5v7WZJ4i4okvoKMncrc*ULKNXHyYcWlg5QIjg$$&mn=balcan%40hotmail.com)

Thank you,
Windows Live

Click the first link to reset your password.

And now it will take you to a new page where you can change the password.

Type new password:

Six-characters minimum; case sensitive

Password strength:

Retype new password:

☐ Make my password expire every 72 days

That's it! Now you can sign in the hotmail.

End

Well, I hope you enjoy the eBook! I would like to thank you for purchasing the eBook. If you need any help with this guide, feel free to send me a private message or add me on MSN: flamingworm@live.com and I will help you.

If the alternative email of somebody is not a hotmail e-mail, you can try to register it, for example, if it is a yahoo, you can register it on www.yahoo.com and so on.

Thank you!
