

-: Chat with Friends through ms dos Command Prompt :-

1) All you need is your friend's IP Address and your Command Prompt.

2) Open Notepad and write this code as it is.....!

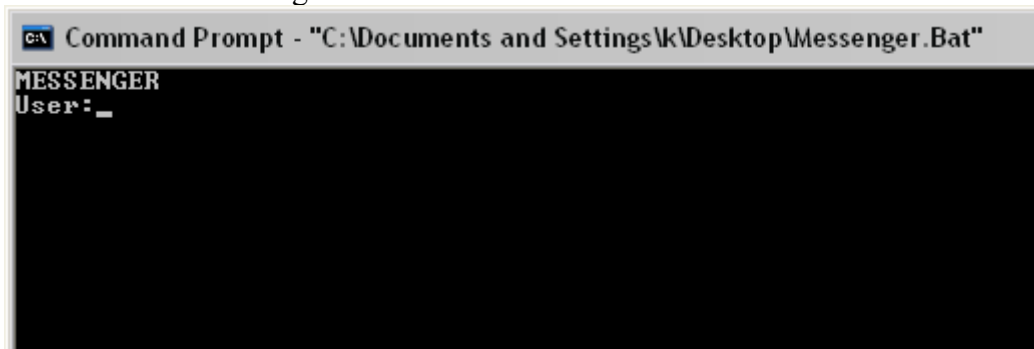

```
@echo off
:A
Cls
echo MESSENGER
set /p n=User:
set /p m=Message:
net send %n% %m%
Pause
Goto A
```

3) Now save this as "Messenger.Bat".

4) Open Command Prompt.

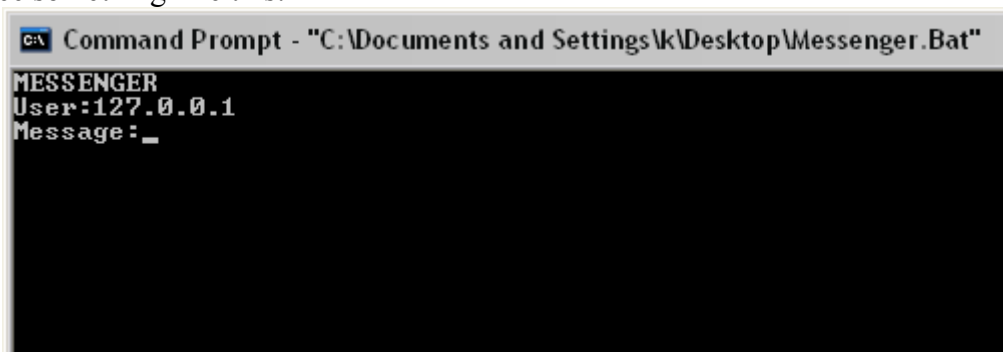

5) Drag this file (.bat file) over to Command Prompt and press Enter.

6) You would then see something like this:

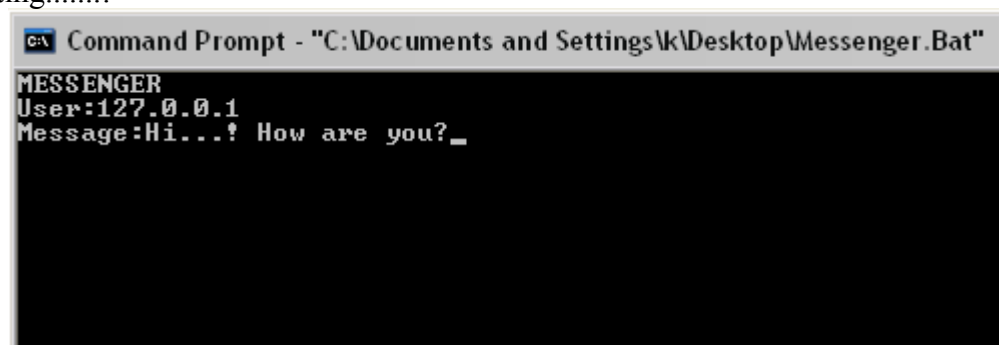

```
C:\> Command Prompt - "C:\Documents and Settings\k\Desktop\Messenger.Bat"
MESSENGER
User: _
```

7) Now, type the IP Address of the computer you want to contact and press enter
You will see something like this:

```
C:\> Command Prompt - "C:\Documents and Settings\k\Desktop\Messenger.Bat"
MESSENGER
User: 127.0.0.1
Message: _
```

8) Now all you need to do is type your message and press Enter.
Start Chatting.....!

```
C:\> Command Prompt - "C:\Documents and Settings\k\Desktop\Messenger.Bat"
MESSENGER
User: 127.0.0.1
Message: Hi...! How are you? _
```
