

## Hacking YouTube Accounts

Hello guys, today I will show you my method for hacking YouTube accounts. This worked the first time for me and it was fairly simple.

### Summary

So, basically we are going to create a YouTube account, and send someone a pm. This pm should say something about missing YouTube subscribers. Then say the only way you can fix it is by logging into their account. I know this method sounds like a long shot, but I will explain further and you will understand.

## The Username

This isn't the most important thing, but in this method we are trying to impersonate YouTube staff, so having a username such as, "The YouTube Helper" or something like that will help.

## The Pm

After you have found the victim you have to send him a pm. The pm should look something like this:

"Hello Username,

I am contacting you because there has been a recent bug on YouTube, and people have not gotten the correct amount of subscribers. You have been a victim of this, and the only way I can fix it is by logging into your account. YouTube hired me to fix this problem and I can provide proof."

If they are subscriber hungry then they will most likely take the bait. It's easier if you know the person in real life because you can say, "Yeah, this guy helped me. He's definitely legit."

## The Proof

This is an extremely important part if they ask for proof. So this is what you're going to do. First, go to their channel. Now, Right click and click view source. Now, if you are not using Internet explorer then you're going to have to copy all of the source code and paste it into a notepad. After you have the source code in notepad press Ctrl+F, and search for Subscribers. It will come up with

```
"<div class="profile-info-value"  
id="profile_show_subscriber_count">(Amount of  
subscribers)</div>"
```

Now add something like

```
<div class="Missing-Subscriber-Value"  
id=Amount_of_Missing_Subscribers"> 14 (this would be the  
amount they're missing) </div>
```

Close to it, like below or above it.

Then make a video about it or take a screenshot and send it to them.

## Results

Well, if you have done everything right, you should be able to get the pass to their account so they can get their subscribers.
