Earn 300 a Day Sharecash

Earn a steady income promoting your uploads

Thank you for buying this short report. First of all, if you don't know what is Sharecash,take a look at sharecash.org It's a file hosting website who pay you to upload files.That mean,every time when someone will download your files you will get paid. How much?Depends from where are coming your visitors.If they are from USA,Canada,UK you get $0,60 per download.For others countries you get between $0,12 and $0,30 per download. Ok,let's start working.

You will need :

A ShareCash Account , Click here to sign-up its free.
A Googlemail Account, Click here to sign-up its free.
Mozilla FireFox Webbrowser, Download here.
AutoPager Add-on for FireFox, Download here.

Investment needed : $0
Difficulty level : Easy
Proof of earnings and some inspiration :

My tested method of makingupto 300 Dollars daily :

Method 1: Youtube

This is an easy way to get started. People will download anything from youtube. So to get started make sure you have an account with youtube. Next go over to daily motion and find a good strip tease video where the girl gets naked at some point in the video.Download the video from daily motion using www.keepvid.com and fire up windows movie maker. The idea is that we want to post the video up to the point where it becomes obvious that the girl is about to show off some skin (boobs or bottom half) and then we cut the video right there. Now what your going to do is upload the cut portion to youtube. Since there is no actual nudity in this video (since you cut it out) youtube will not take the video down. Upload the entire video to sharecash and put the link in the description box next to your video. Give the video a long sexy name and watch as people download the entire video from your link in order to see the girl naked! Tons of people search for girls on Youtube so your videos will get plenty of views very fast.

Method 2: Orkut and Myspace method

Signup to yahoo and myspace account. Make around 300-400 friends on them. It will take little bit of time but you can do it easily if you spend around 1 hour daily on that and add around 50 persons a day. Its not so easy but its not even so hard. I got around 500 friends within twoweeks. Most important thing: Concentrate only of UK, US and Canada people because sharecash only pays for these countries signups. It would be much easier for you if you join US and UK communities. If you are comfortable then try to make your profile by a girl's name. Mostly people add a girl more commonly than a guy. After creating a ID with 400-500 friends. Add your uploaded pic in your profile or update status. For example: Create a notepad file. Clock it with your sharecash link and add in your profile. Encourage peoples to download your file by saying that this is your phone number, coolest or sexiest pic of yours, or be wilder like this is my nude cam show download it. There will be many hornies there to download your stuff. Update your profile daily and keep on adding more US and UK friends.

Method 3: Forums are your friend!

Ahh yes forums my favorite place to get downloads from. So what we're gonna do for this method is find any porn forum and copy a few porn passwords that people post up. If you just look around at a few places like http://forum.dumpstersluts.com/ you'll find a few passwords. Now go ahead and copy those passwords into a text document and archive it with winrar. Here's where we're going to do things a little differently. Most people will go and outright post these files on the forums with your download link. Now this will bring in a few bucks, but when the passwords run out or someone sees a few postings about how they already use these passwords, your thread is pretty much dead. Instead your going to sign up to as many porn forums as you can and place your download link in your signatur with anchor text such as "Free

BangBros Passwords." Then just post all over the place saying things like "Wow nice video" or "Thanks for the videos" stuff like that so people will see your name and signature. If the forum will not allow your download link in the signature just make a free blogger blog with the download link on there and have your signature redirect them there with the same achor text. You will see huge traffic with this method, trust me everyone wants free porn passwords!

Method 4: Roms and Emulators

This is my biggest money maker by far, and its actually pretty easy to set up. The only reason that this is the most advanced method is because it requires a few things such as a website, hosting and some experience in creating a website and making it look decent. If you can make this method happen you will see a huge amount of downloads come through. What you do is search for nintendo ds roms and emulators in google. Now when you find a good site just download as many as you can. I use a few sites to download ds roms, but starting up I just went to mininova and downloaded a huge file with like 100+ ds roms. This got my site off the ground much faster and took the hassle out of downloading a 100 or so files seperately. Just upload all the files to sharecash seperately and post them on your new website. If you keep your site updated with new releases you can get a couple thousand downloads in a day easy. If you submit your site to any of the top 100 Rom lists you can get some awesome traffic that way. Altermatively you can submit to digg and reddit claiming that you've found the best DS Rom site on the web. Just remember to put a disclaimer on your site stating that all roms downloaded need to be deleted within 24 hours unless the legal copy is owned. That statement will keep your rom site legal so dont forget it!

Method 5: Digital Comics

Digital Comics are very popular on the web currently, and no one is using sharecash to promote online comics. There are a few things you can do here. For one you can visit http://www.lorencollins.net/freecomic/ and download a few comics and then post them on a blogger blog. Of course digg traffic works well here since comics usually cost money to download online. Another way to explode this is to use a site called 4chan.org. Now what you do is visit the comic section pick a comic book you downloaded and post the front cover and then next to that post the download link. A small description will help with this and get a couple people commenting on it. Again everyone loves free comics and 4chan is a great place to get your comics downloaded.
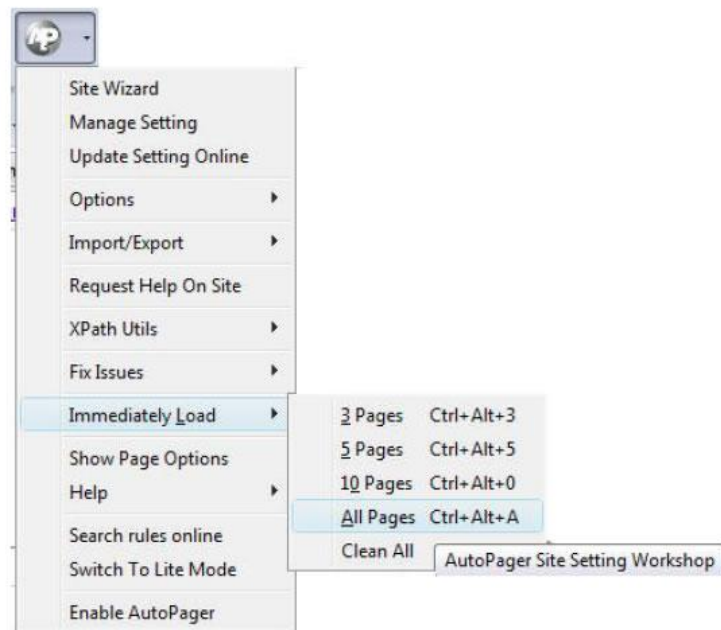

Method 6: Exploit Lazyness

This is probably my favorite method just because its actually very creative. What you need to do is go to any manual traffic exchange (look on google you'll find a ton) and sign up to a few. Upload a large picture or any small program that is about 1 to 2 megs in size and name it "Traffic Exchange Bot." Make a quick blogger blog and delete everything from the page except for the post and title. Make The title large and the body easy to read. State that you have a free traffic exchange bot that they can have to use for the traffic Exchange they are on. You can customize the page and make one for each traffic exchange you use. People will download the file hoping for a bot, even if you dont have a bot for them to download once they download the file and see that its not a bot they will more than likely just move on with their traffic exchanging while you just got a download out of it! Make sure you .rar the file that you upload so it appears believable. You can participate in the exchange to get credits or just buy some, either way you will get conversions easily since everyone hates having to do manual traffic exchanges.

Method 7: Make your website or blog especially for sharecash

People just love free stuffs. When you are start getting some decent money from sharecash, just invest in buying a domain and hosting and make website dedicated to downloading free stuffs. SEO it regularly or to improve traffic always do yahoo answers posting along with link back to your website. Just don't spam them otherwise you will be punished.

Method 8: Gmail

Step one : You are going to be searching for e-mail adresses so go to http://www.google.com, clic on "Search settings" in the top right cornerand change the number of results to display "100" per page, now clicksave preferences. In the search bar you will type a keyword(s) and the e-mail extension in speech marks. For example : My keyword "@gmail.com" What this will do is search for webpages that contain Gmail e-mailadresses and that are also to do with your keyword. The speech marksaround "@gmail.com" make sure that "@gmail.com" is on every webpagethat is a result of the search. E.G, you could type "peanuts" and every page that is found must contain the word "peanuts" somewhere in the text. You can also search single websites for e-mail adresses as shown on theexample below; site:twitter.com "@gmail.com" The example shown above will search the whole of twitter.com for"@gmail.com" email adresses. I recommend that your search has atleast 1000 results. **Step two :** With your results in focus, click the arrow at the side of the AutoPager icon as shown in the picture below. Then goto "Immediately load > All pages" .

Step two continued :
With your search results still in focus, scroll all the way down andAutoPager should load the next page of results onto the same page youare currently on. Keep scrolling till all pages have loaded onto the samepage.

Step three :
Press "ctrl + a" to select all of the pages then press "ctrl + c" to copy theresults.
With the results still in the clipboard (Still copied) gotohttp://extractor.prusac.com/ . Paste your results into the first box which says "1. Put text with email addresses here:" The settings should already be correct with "unique emails" and "sortticked" and also "new line" should be selected.

Step three continued :
Click "Start Extracting Emails" and the e-mail adresses should show in theresults box below almost instantly. Now copy the results from the results box paste them into notepad. Sometimes the e-mail adresses seem to end in ".com." instead of just".com" so in notepad go to "Edit > Replace" and in the "Find what" textboxtype ".com." without the speechmarks in the "Replace with" textbox type".com" , without the speechmarks.

Step four - The Final Step :
In notepad press "ctrl + a" and then "ctrl + c" to copy all your e-mail adresses then go to http://www.gmail.com Log-in to your Googlemail account and click on "compose mail" in the leftcorner. In the "To" box paste in your e-mail adresses.

In the "Subject" box type in "RE : Breakup" without the speechmarks. Now before entering the main text of the e-mail it would be best to go over to http://sharecash.org and uploading a video file, i suggest around 5mb and make a note of the download url of the file once it is uploaded.

Go back to your open Googlemail page and in the message body enter the following : You really got the guts to break up with me over email,bitch??!?! Tell you what! I just made a nice compilation of your/our best scenes and put it up for download on Your ShareCash Link.

Oh and btw: This email just went out to your parents. I bet they didn't know you're into dirty stuff like this.

Cheers!
Your ex bf
Now click send of course. And well done thats how easy it was, just waitfor the money to start pouring in!
I hope you learnt something new from this e-book.
